Low pass LC filters for VPLL and VPHY

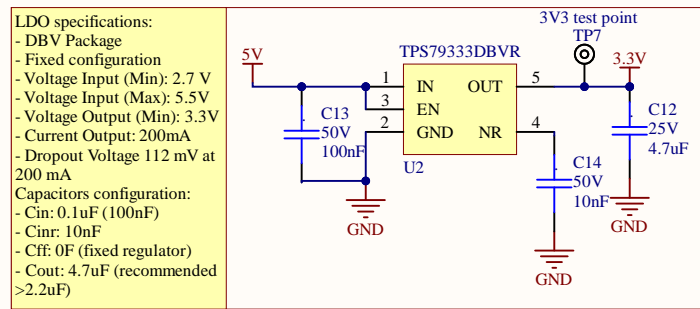

USB VBUS Filter

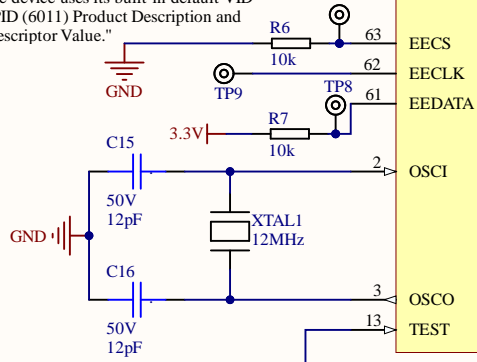

Optional zero-ohm resistor for a DC path, or capacitor for a high-frequency path between shield and signal ground to minimize signal noise and provide EMC compatibility (to be tested if required).

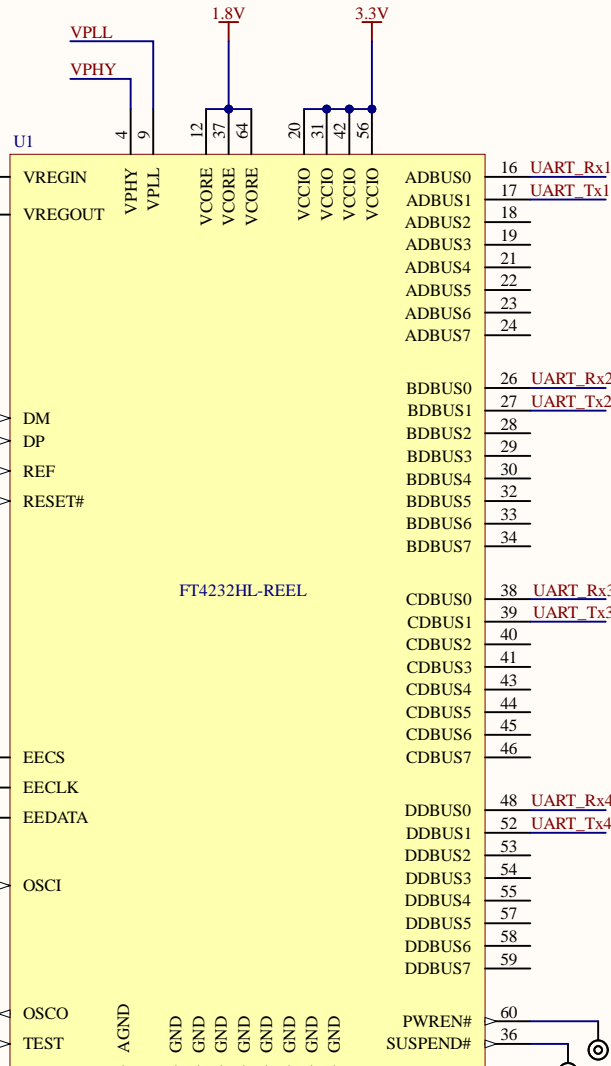

Linear Voltage Regulator for VREGIN (LDO)

From FT4232H datasheet: "If no EEPROM is connected (or the EEPROM is blank), the FT4232H will default to serial ports. The device uses its built-in default VID (0403), PID (6011) Product Description and Power Descriptor Value."

Decoupling Capacitors

Debug interfaces

Testpoints for debugging IC
PWREN# = 0: Normal operation.
PWREN# = 1: USB SUSPEND mode or device has not been configured.
SUSPEND#: Active low when USB is in suspend mode.

Redundant pin header
